EDUCATION

Rensselaer Polytechnic Institute - Troy, NY

Major: Games and Simulation Arts and Sciences with a Concentration in Computer Science

Relevant Coursework: Game Architecture, Data Structures, Operating Systems, Computer Graphics for Games

WORK EXPERIENCE

Mechanical Orchard

Jun 2024 - Aug 2024

Jun 2025 - Aug 2025

- Wrote tools for modernizing legacy code using Rust, Elixir, and Python
- Created a Python tool to parse and translate legacy table transaction logs into modern usable SQL
- Worked with Agile frameworks and Kanban like tools such as Jira, Shortcut, and Pivotal Tracker by engaging in Extreme Programming
- Participated in daily 6-8 hour pair programming sessions with experienced senior developers
- Added an automated Github CI workflow which used AI to produce ADRs for large commits

PROJECTS

Lantern Light - Enemy and Systems Programmer

Sep 2025 - Dec 2025

- Demo now available on Steam with over 100 wishlists!
- GDC Best Game Design Grand Prize Nominee!
- Created adaptive enemy scripts and behaviors which change based on player sanity
- Developed 6 enemies with unique attack patterns and weaknesses

Blood Vessel - Solo Project

Nov 2024

- Top down brawler with 3D cell shaded pixel art style
- Satisfying high intensity combat and tense resource management with vibrant particle effects
- 3 different enemy types and 2 boss fights with unlockable abilities to keep gameplay interesting

Radiant Sands - Lead Programmer and Project Manager

Feb 2024

- Fast-paced movement shooter with Ultrakill inspired mechanics and combat
- Implemented diverse loadout and ability options allowing a variety of playstyles
- Large scale boss fight with adaptive player tracking and inverse kinematics
